

LeanTeX v2 Minimal Example

This document has two Lean snippets. The first should pass and show an info message.

```
Lean
#check Nat.succ
example : 1 + 1 = 2 := by decide
```

```
==== Messages ====
[info] 1:1: Nat.succ (n : Nat) : Nat
==== Infoview State ====
[info] 3:1: [infoview] tactic state:
no goals
==== Infoview Messages ====
[info] 2:1: [infoview message] Goals accomplished!
```

This one intentionally fails so you can see snippet-local errors.

```
Lean
example : 1 + 1 = 3 := by
  decide
```

```
==== Messages ====
[error] 2:2: Tactic `decide` proved that the proposition
  1 + 1 = 3
is false
==== Infoview State ====
[info] 3:1: [infoview] tactic state:
⊢ 1 + 1 = 3
==== Infoview Messages ====
[error] 2:1: [infoview message] Tactic `decide` proved that the proposition 1 + 1 = 3 is false
```

Whole Extracted File

```
==== Messages ====
[error] 10:2: Tactic `decide` proved that the proposition
  1 + 1 = 3
is false
[info] 4:1: Nat.succ (n : Nat) : Nat
==== Infoview State ====
[info] 9:1: [infoview] tactic state:
⊢ 1 + 1 = 3
==== Infoview Messages ====
[error] 10:1: [infoview message] Tactic `decide` proved that the proposition 1 + 1 = 3 is false
[info] 5:1: [infoview message] Goals accomplished!
```
